

BUILDING BOWLING'S FUTURE TODAY!

Reliability - Flexibility - Durability

Made in the USA

Z-Bumper And Gutter Systems

The **BENEFITS**

US Bowling's customers expect nothing but the best when it comes to US Bowling's product line.

So why would it be any different when we decided to make the world's most durable, reliable and cost effective bumper system in the industry.

When doing so, even we surpassed our own expectation when we designed the Z-Bumper and Gutter System.

When manufacturing the Z-Bumper and Gutter System, US Bowling uses only the very best materials available. By doing so, US Bowling has designed a bumper and gutter system that creates more ball action than any other bumper in the industry, bringing more excitement to your bowling center and customers.

This system is a mechanic and installers dream, you "set it and forget it"
...it is virtually maintenance free.

US BOWLING
CORPORATION

INCREASED

Revenues

BANK ON MORE REVENUES with US Bowling's Z-Bumper Gutter System.

Increase Revenues with:

- Birthday Parties

Z-BUMP
PREMIUM BUMPERS

Bumper and Gutter

EZ-LIFT system

Z-Bumper And Gutter Systems

Product Features

- Z-Bracket Design holds the gutters firmly in place
- No more gutters interfering with the bumper rails
- Thickest gutter in the Industry
- No more balls bouncing out of gutters
- Grey Color PVC means no more painting

US Bowling's **EZ-LIFT SYSTEM** is a Proprietary System that allows your center to:

EZ-LIFT PNEUMATIC CYLINDERS

- Less wear and tear than other bumper systems
- Years of trouble free operation
- E-Z to Install
- Low Maintenance
- Installs on any truss, crib, or I-Joist foundation system
- All lanes run off a single air compressor
- No High Voltage Power running under lanes as required by other systems.

When Strength Truly Matters

DURABLE?

Absolutely!

Is US Bowling's Z-Bumper **DURABLE**?

ABSOLUTELY!

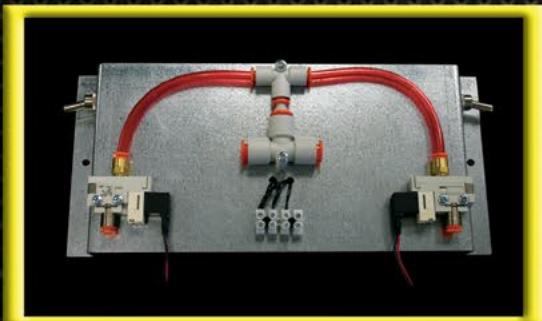

How is that Possible?

"**FLEXIBILITY**" is the key word here!

US Bowling's Z-Bumpers are made from a material with a memory feature that no matter how much you bend the risers or bumpers rails, the system will always snap back to its original standing position. You will thoroughly enjoy the tremendous bowling excitement this will bring to any birthday party, family event, kid's leagues and more.

AIR CONTROL SYSTEM

Air Control System
USB-ZB-106

US Bowling's Air Control System is compatible with any scoring system with a 12 volt signal. The bumpers can then be raised through your automatic scoring system for young bowlers and lowered for adults. Allowing the whole family to bowl on the same lane.

- Available in both 110 Volt and 220 Volt Systems
- Mechanic Maintenance Switch allows the mechanic to put the bumpers up and down from the pinsetter area for servicing
- Runs off most air compressors.
(Air compressor not included)

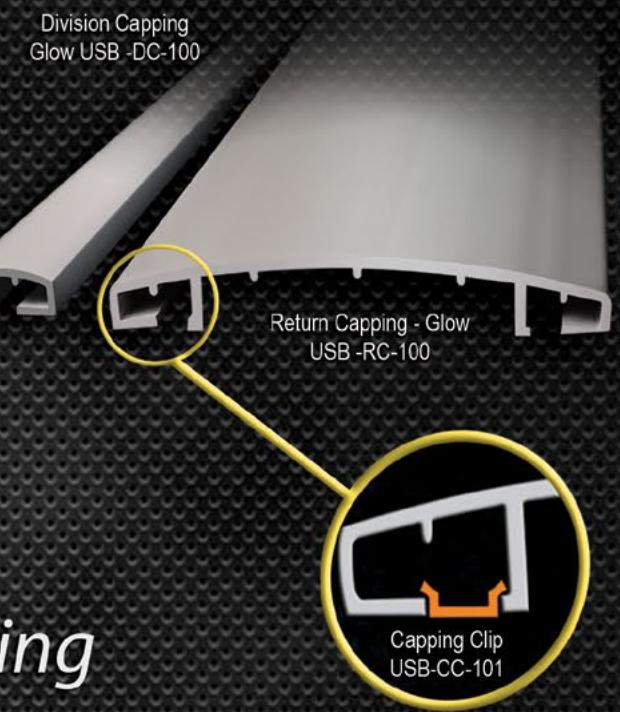

US BOWLING CORPORATION

Z-Lighted and Glow Capping

Snap Cap System

Don't let the simplicity of our Snap Cap System fool you. This is the most functional, innovative and durable capping on the Market.

- Allows easy access to ball return track
- No screws means no more hassle
- No tools required to remove snap capping

Z-Lighted Capping

US Bowling's Z-Lighted Capping System brings your division capping to life. Our E-Z to use Pre-Programmed Controller gives your center the flexibility to choose one of many lighting pattern sequences.

Features

- High intensity lighting
- Four Color Lighting (Red, Green, Blue, Yellow)
- Impact Resistant "GLOW" PVC Capping and Clear Lens
- Simple to install and operate
- Removable lens cover for E-Z Maintenance

Made in the USA
