

# Sword Nano X versus Sword Nano

## DOPLAR™ TEST

**Sword Nano X**  
 NRG™ Solid Reactive  
 2000-grit Abralon®  
 C<sup>3</sup>™ Centripetal Control Core

→ **Sword Nano X**

Laydown: 20.85  
 Launch Angle: -2.00°  
 Break Point: 42.46'  
 Impact Point: 17.42

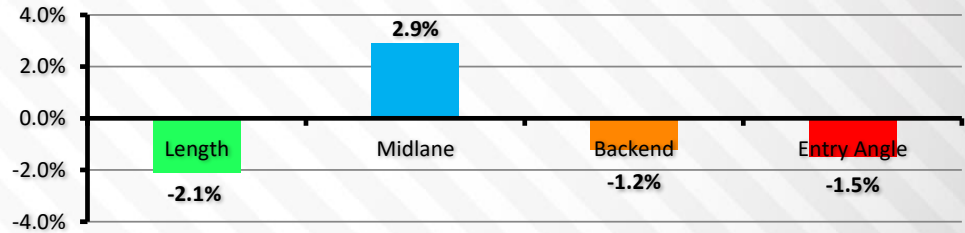

**Sword Nano**  
 NRG™ Smooth Hybrid Reactive  
 4000-grit Abralon®  
 C<sup>3</sup>™ Centripetal Control Core

→ **Sword Nano**

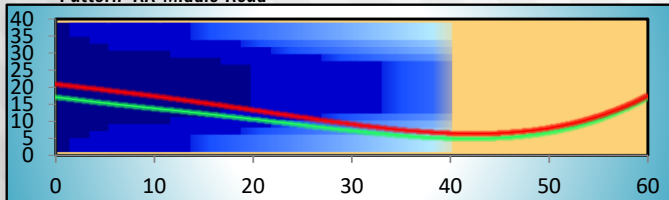

Laydown: 17.09  
 Launch Angle: -1.70°  
 Break Point: 42.05'  
 Impact Point: 17.00

- The Sword Nano X thrived on heavy oil.
- Both balls handled with great control and power.
- NRG Smooth Solid is a great transitional cover after NRG Solid.
- The C<sup>3</sup> Centripetal Control Core remains the most forgiving shape in Storm's lineup.
